SUMMARY

Results-driven Software Developer with hands-on experience in backend development using Java and Spring Boot. Skilled in RESTful API development, integration testing, debugging, and optimizing backend services. Experienced in microservices architecture, database management, and cloud technologies. Adept at collaborating with cross-functional teams to deliver high-quality, scalable, and maintainable software solutions. Passionate about writing clean, efficient, and well-documented code to improve system performance and reliability.

EDUCATION

Stevens Institute of Technology, Hoboken, New Jersey, USA

May 2024

Master of Science, Computer Science: 3.7/4

Gujarat Technological University, India

May 2020

Bachelor of Engineering, Information Technology: 5.9/10

WORK EXPERIENCE

Tays Inc - Baltimore, MD, USA

Oct 2024 - Feb 2025

Software Developer - S.S.A. Contractor

- Developed and maintained scalable backend services using Java, Spring Boot, and microservices architecture, resulting in improved system performance and reliability.
- Increased code quality and reduced software defects by 30% by implementing and maintaining comprehensive JUnit and integration test cases.
- Contributed to agile development sprints and performed thorough code reviews to ensure timely and high-quality deliverables aligned with Agile/Scrum practices.

Rishabh Software Pvt Ltd - Vadodara, GJ, India

Jan 2022 - June 2022

Full Stack Web Developer Intern

- Acquired practical skills in SQL, HTML, CSS, Javascript, Node and ASP.Net through comprehensive training.
- Developed an Employee Management System to demonstrate practical application of CRUD operations and end-to-end web development skills.

Jay Ambe IT Solutions - Anand, GJ, India

June 2020 - Dec 2021

IT Support Specialist

- Provided technical support for software and hardware issues, resolving 90% of tickets on the first contact through systematic troubleshooting processes.
- Assisted in setting up and maintaining computer systems and networks.

ACADEMIC PROJECTS

Shield Guard - Java, Spring Boot, JavaScript, JSON

- Created a browser plugin using JavaScript to protect users from accidentally navigating to malicious sites by validating site domains against bloom filter.
- Developed a Bloom filter with a Java bit array of size 50505050 and trained it with a dataset from Kaggle (6.5 million URLs) using 11 hash functions.
- Exposed the Bloom filter with a simple Spring Boot Web API that accepts URLs from the plugin and warns the user if the site they are about to enter is potentially malicious with 98% accuracy.

Credit Card Fraud Detection - Python, Machine Learning

- Implemented a logistic regression model with 87% accuracy, enhancing fraud detection by 15% through ensemble techniques.

Admin Dashboard Interface (Freelance Project)

- Built a React-based admin dashboard with integrated RESTful API functionality, enabling real-time content and user management while ensuring smooth front-end and back-end integration.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript/TypeScript
- Frameworks:** Spring Boot, NodeJS, JUnit, React.js
- Web-Tech/Database/Tools:** Git, ReadyAPI, BitBucket, Lombok, SQL Server, MongoDB, HTML/CSS
